Geography Quiz #1 - 30 Marks

Part 1: Matching

1. Match the word to the definition. (10 marks)

- | | |
|--------------------|-------------------|
| a. Political Map | f. External Force |
| b. Topographic Map | g. Tectonic Plate |
| c. Physical Map | h. Erosion |
| d. Thematic Map | i. Weathering |
| e. Internal Force | j. Geography |

	A map that shows the shape of the land, including mountains, valleys, and elevation changes using contour lines.
	A force that happens inside the Earth, like earthquakes and volcanoes, which changes the land over time.
	A map focusing on a specific topic, such as population, weather, or land use, helps show patterns or trends.
	When wind, water, or ice wear away rocks and soil, moving them to a new place.
	The study of the Earth's land, water, people, and places, and how they connect.
	A map showing countries, cities, and borders that helps people see where different places are located.
	When rocks break down into smaller pieces because of wind, water, or temperature changes.
	A force that happens on the surface of the Earth, like wind, water, and ice, which shape and wear down the land.
	A huge piece of the Earth's crust that moves slowly and can cause earthquakes, volcanoes, and mountains to form.
	A map that shows natural features like rivers, mountains, lakes, and oceans. It helps people understand the land and water in an area.

Part 2: Short Answer

2. What are the seven (7) parts of a map? Name each part and briefly explain what it is used for. (7 marks)

3. Explain three (3) ways humans have changed landforms. Give an example of a human-made landform. (5 marks)

4. Name 1 type of volcano and describe how it is formed. Provide an example of this volcano. (5 marks).

5. Describe what the Ring of Fire is. (3 marks).
